EDUCATION

Ph.D. in Computer Science

University of Michigan

📅 Sept. 2018 — Present

📍 Ann Arbor, MI, USA

- Advisor: [Rada Mihalcea](#)
- My main research interest is in holistically representing **Multimodal** sources (i.e., Language and Vision) for general-purpose applications. Apart from this, I am interested in Humor and Reasoning.
- GPA: 4.0/4.0

B.E. in Computer Science

Universidad de la República

📅 March 2010 — May 2015

📍 Montevideo, Uruguay

- Extracurricular courses: Introduction to Deep Learning, Deep Learning applied to Natural Language Processing, Formal Grammars for Natural Language, General-Purpose Computing on Graphics Processing Units and Semantic Parsing.
- GPA rank: 4th/665

AWARDS

1st place in TASS 2017, Task 1, corpus GralTASS 1k
SEPLN 2017. Sentiment Analysis contest. We also finished 2nd in one of the other two corpora.

3rd place in the Engineering Fair ("Ingeniería deMuestra")
In the CS Thesis Contest. October 2015.

1st place in National Microsoft Hoshimi Programming Contest
In December 2009

Finalist in National Mathematics Olympiads
In December 2003

GRANTS & SCHOLARSHIPS

Research Initiation Grant

By CSIC, for a project on the study of Subjectivity and its application to Humor Classification using DL. \$16,632. November 2017.

Research Initiation Scholarship

By ANII, for the undergraduate thesis project. \$2,400. August 2014.

RESEARCH WORK EXPERIENCE

Research Intern

Netflix

 May 2020 — August 2020  Los Gatos, California (remotely)

- Project on Language and Vision Representation Learning through videos.

Principal Research Engineer

Xmartlabs

 September 2016 — August 2018  Montevideo, Uruguay

- I started a Machine Learning area within the company, highly focused on Mobile Computer Vision. It included the pioneering idea, design and development leadership of the open-source project [Bender](#), the first framework to run neural nets on real-time on iPhone using the GPU. After its release, competitors have subsequently emerged from big tech companies (i.e., Google's TF Lite, Apple's Core ML, Facebook's Caffe2Go and Baidu's MDL). I worked also on other CV+ML projects for the Entertainment, Retail and Agro industries.

Teaching & Research Assistant ("Asistente — Grado 2")

Universidad de la República

 March 2014 — August 2018  Montevideo, Uruguay

THESIS SUPERVISIONS

Machine Classifier System of Answers According to their Relevance ("Sistema clasificador automático de respuestas según relevancia")

B.Eng. thesis, Universidad de la República

 August 2016 — December 2017
